PDF (19 MB) Abstract. Wetlands
are, in the Canadian settler
imaginary, ambiguous spaces that
are neither strictly landmasses nor
only bodies of water. This paper
explores how Canadian
settler-colonialism has
incorporated wetlands into
systems of land ownership and
control by tracing the history a
specific wetland, a peat bog
known as Burns Bog since the
1930s in the area settlers call ...

Settler ... - Burns bog We went to
burns bog on wednesday, october
5, 2016. There were 7 stations
that I went to, and learned so
much from. The first station I
went to I made a Salmon
Keystone Chain. Iâ€™ve learned
that a keystone species is a
species in an ecosystem that other
species really depend on. If the
keystone species disappeared, the
ecosystem would totally change.

... - Burns Bog boasts an
unusually high level of
bio-diversity, because it is sur-
rounded by forests, swamps and
marshes, which are a vital part of
this peatland. Burns Bog is the
largest undeveloped urban land
area in Canada (10,000 acres/42
sq km). It also contains the largest
waste landfill site west of
Toronto. Thu, 19 Nov 2020

â€™Discover Burns Bogâ€™
Bill Burns states: â€™As bogs
expand, they suck carbon out of
the atmosphere, and trap carbon
in peat, cooling down Earth like
gigantic air conditioners. Bogs

work to cool the planetâ€™.â€™
According to Bill Burns, bogs
delay decay often for thousands
of years. Plants die but do not
decay because there is little
oxygen to aid the ... Mon, 09 Nov

9780969884514 ... - Burns Bog is
an ombrotrophic peat bog located
in Delta, British Columbia,
Canada. It is the largest raised
peat bog and the largest
undeveloped urban land mass on
the West Coast of the Americas.
Burns Bog was originally
4,000â€™4,900 hectares
(9,900â€™12,100 acres) before
development. Currently, only
3,500 hectares (8,600 acres)
remain of the bog. Burns Bog is
habitat to more than 300 plant ...

Members agreed that their comments related to the fire from their September 15 meeting remain relevant, so they have been appended to these notes. In addition the following comments were made: Going on site was invaluable. The recent fire ... Tue, 15 Sep 2020 10:35:00 GMT Burns Bog Scientific Advisory Panel Minutes 20-Oct-05 - Burns Bog in Vancouver, Canada is a good example of this. This Bog was utilised first by indigenous peoples and later it was partially used for sod peat production. These have been influential impacts ecologically, but Burns Bog has largely retained its hydrological integrity. Though now a cutover peatland, spontaneous regeneration has been rapid and has resulted in high species diversity ... Tue, 17 Nov 2020 22:00:00 GMT The future of Burns Bog, Canada: stakeholder participation ... - Burns Bog represents one of the largest, relatively undisturbed habitats in the lower Fraser River valley. Part of the value of Burns Bog is due to its large size, and limited and restricted access.

Human disturbance of wildlife is very low because of tight restrictions on vehicle and pedestrian access. The large freshwater wetlands, particularly in winter and spring, attract large numbers ... Status of Wildlife in Burns Bog, Delta - 1999 - Don DeMill is a north Delta resident who knows Burns Bog intimately. He directed the documentary film Burns Bog: A Road Runs Through It and contributed to the naturalist book Discover Burns Bog. Video: 10 deer killed on Metro Vancouver highway in one month -
