Magical thinking "Reality or illusion? - Research shows that the frequency of magical thinking and superstitious behavior increases under conditions of stress. A possible explanation for this finding is that stress reduces the individual's sense of control and that to regain control she or he engages in magical rituals or superstitions. This study tested the validity of this explanation. To this end, the effects of stress on the ... Tue, 27 Oct 2020 17:09:00 GMT
Effects of Stress and Desire for Control on ... - Magical Thinking By Dr. Alejandra Sequeira. Individuals with Obsessive-Compulsive Disorder (OCD) tend to feel overly responsible for the safety and well-being of themselves and others. This expanded sense of responsibility is associated with Magical Thinking, which is defined as the belief that one's thoughts, actions, words, or wishes can alter the course of events in the physical world.
